

Environmental Policy for Andusia Holdings Ltd

Andusia is committed to minimising the potentially harmful effects of waste management operations wherever and whenever possible.

To support this, Andusia have developed a set of objectives to guide all of our operations.

Through regular communication and training, employees are required to implement these objectives in their day-to-day work. We also encourage our customers and stakeholders to consider their own environmental impact, ensuring high standards are met throughout the entire supply chain.

COMMITMENTS

- Operate in accordance with international law and regulations
- Ensure employees are sufficiently trained to carry out their job role whilst following environmental policy and encouraging best implementation practice
- Where possible, reduce levels of pollution, harmful emissions and other impacts relevant to the context of our business
- Always consider any environmental impact arising from our operations, office and travel
- Encourage those in our supply chain to consider the environmental impact within their own operations
- Review and monitor environmental performance to ensure objectives above are maintained
